ERR_MODERN_ORACLE ■

CRITICAL ERROR

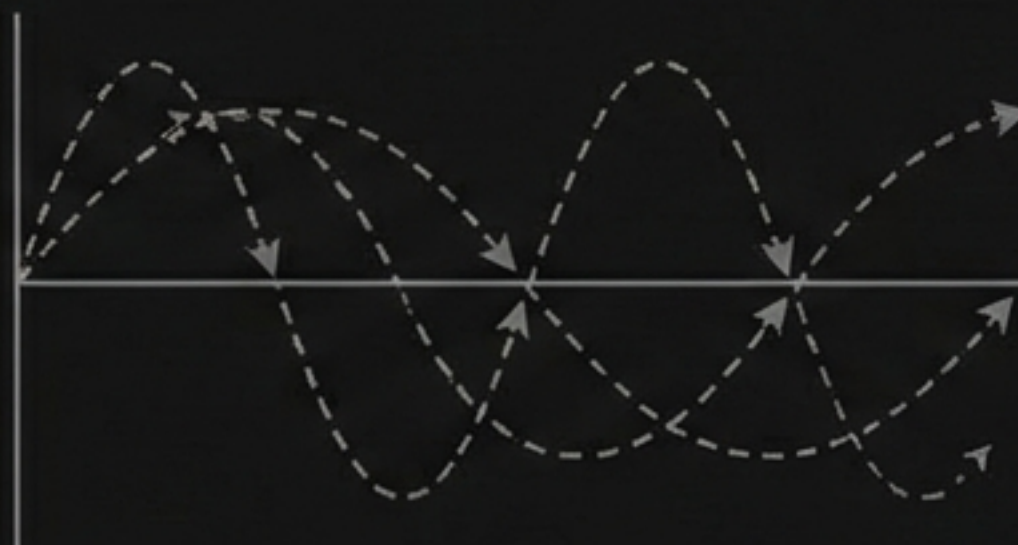

[BLACK_BOX]

Current on-chain oracles (Chainlink/Pyth) function as relays. Users trust the network, not the computation.
Verdict: **BLACK BOX / UNVERIFIABLE.**

WARNING

[MUTABLE_WAVEFORM]

Traditional I Ching/Cosmology relies on human interpretation. Readings can be revised post-facto.
Verdict: **MUTABLE / NO_ACCOUNTABILITY.**

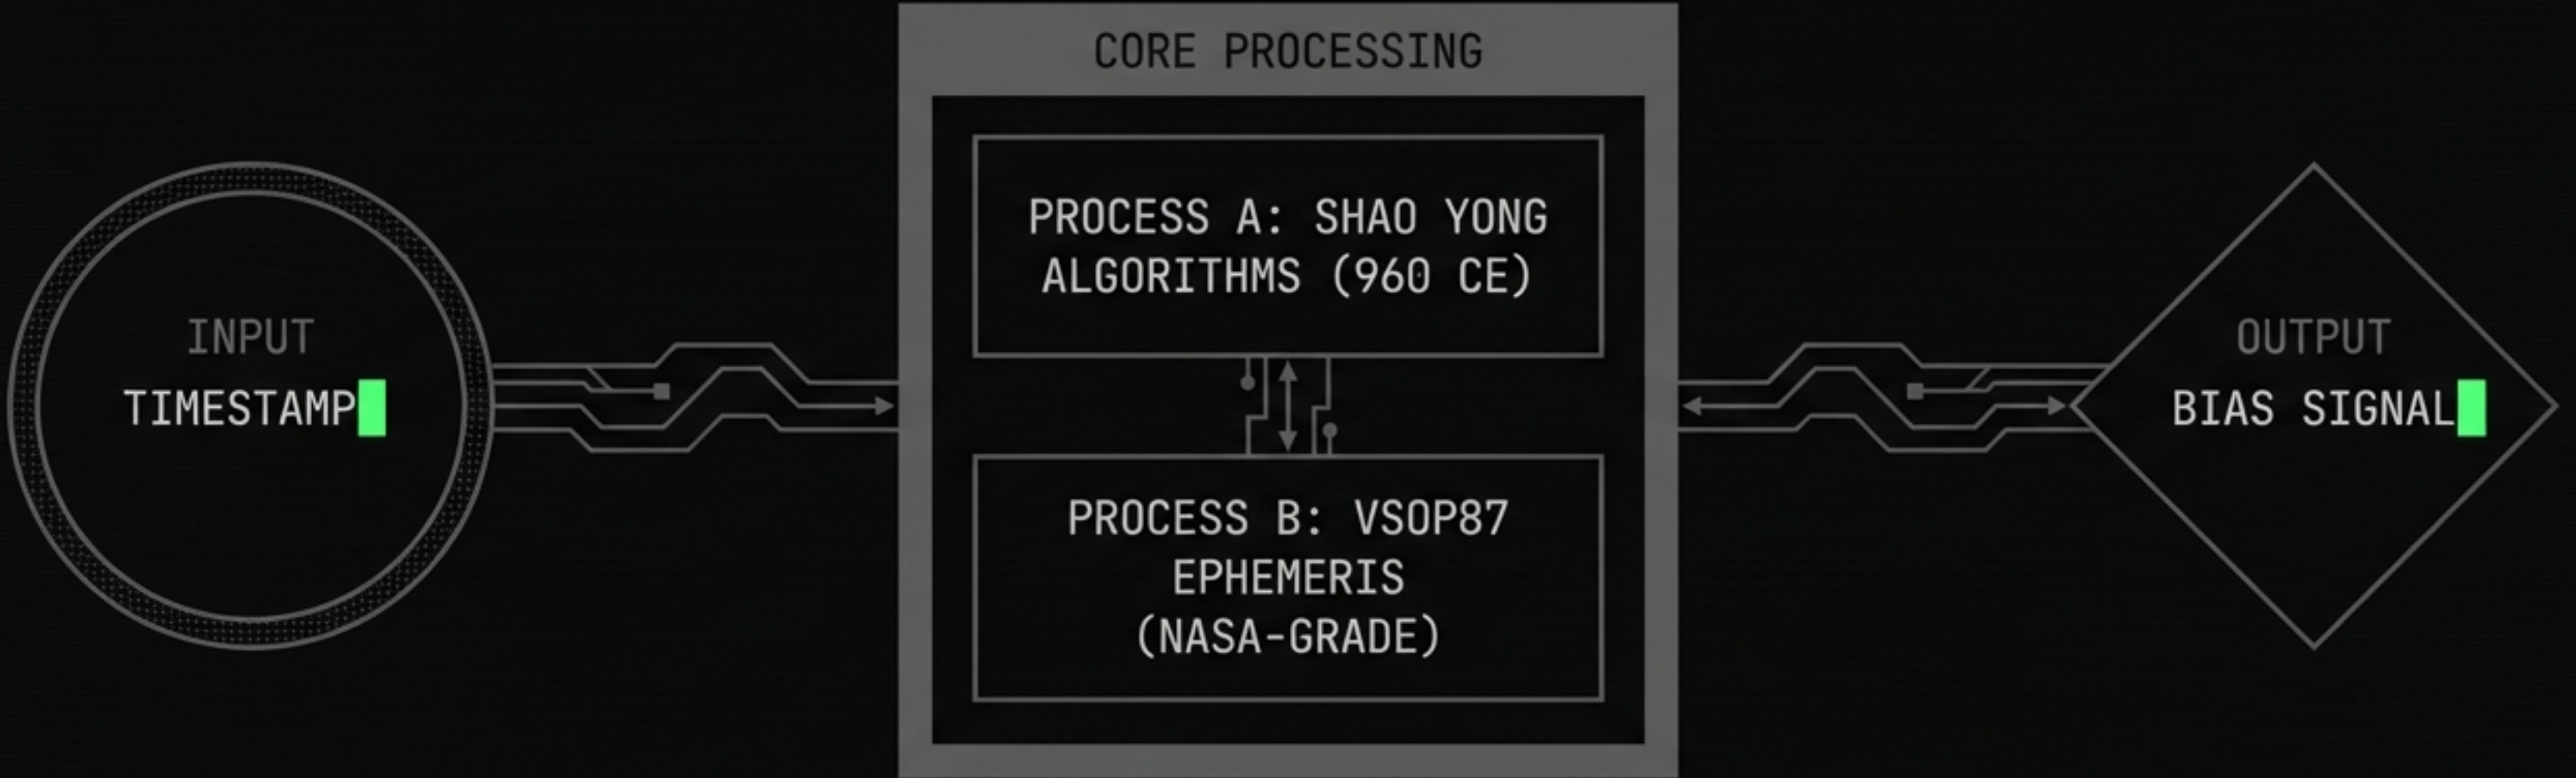

SIGNAL: ACTIVE

QUERY: IS THIS SERIOUS?

The math is rigorous (Shao Yong, 960 CE). The astronomy is NASA-grade. The tool makes epistemological choices explicit rather than hidden.

QUERY: WHY BLOCKCHAIN?

Ancient oracles used ritual to prevent revision. We use cryptography. The registry is tamper-evident and permissionless.

QUERY: BUSINESS MODEL?

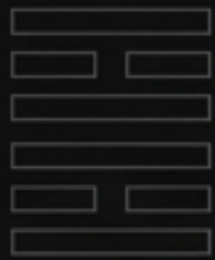

Open-source infrastructure. Premium reasoning branches. API tiers. White-label for cultural institutions.
